EMPLOYMENT BULLETIN

STATE OF RHODE ISLAND
J. JOSEPH GARRAHY
GOVERNOR

VOLUME 28 DECEMBER 1982 NUMBER 12

RHODE ISLAND EMPLOYMENT IS 394,300 IN NOVEMBER

Overall employment in Rhode Island decreased slightly in November as job losses in the Manufacturing industries more than offset gains recorded in the Nonmanufacturing sector, according to Mary C. Hackett, Director of the Rhode Island Department of Employment Security.

Preliminary estimates prepared by the Department of Employment Security, in cooperation with the U. S. Department of Labor's Bureau of Labor Statistics, indicate there were 394,300 men and women employed in mid-November in Rhode Island. This represents a decrease of 300 jobs over the month. On an annual comparison, November employment was 10,600 jobs below the year ago employment level of 404,900.

MANUFACTURING

The November Manufacturing estimates show a decline of 600 workers from October to a total of 118,400, down 7,800 jobs from the year ago level of 126,200.

Overall, the Durable Goods industries accounted for the entire monthly manufacturing job decline. Within this sector, Fabricated Metals dropped by 200 jobs, Lumber/Furniture, Stone-Clay-Glass, Nonelectrical Machinery, Electrical Machinery and Instruments each lost 100 workers, Primary Metals employment was unchanged and Transportation

SEASONS GREETINGS AND A WORD OF THANKS TO RHODE ISLAND EMPLOYERS

Mary C. Hackett, Director, and the staff of the Rhode Island Department of Employment Security take this opportunity to extend holiday greetings to the Rhode Island employer community and to all readers of the Employment Bulletin.

A special word of thanks is extended to those employers who assist the Department to determine trends in the State's economy by providing essential employment information each month. Such key indicators as employment levels, weekly production hours and worker earnings become the basis for both state and national reports and statistics prepared and published by this Department.

The Department will continue its efforts to publish accurate and timely data every month to assist you in reaching decisions and planning for future employment needs. To all, a Happy and Prosperous New Year.

HAPPY HOLIDAYS!

Equipment added 100 jobs in November. Since last November, this sector has lost 3,000 jobs, including 800 each in Primary Metals and Electrical Machinery and 600 in both Nonelectrical Machinery and Instruments. Transportation Equipment (+500) and Lumber/Furniture (+100) were the only Durable Goods industries showing increases over last year.

Nondurable Goods employment remained unchanged from the October level as monthly gains of 100 jobs reported in Food-Beverage, Apparel, Rubber, Plastics, and Leather Products were offset by losses of 100 in Textiles and Paper Products and 300 in the Miscellaneous Manufacturing industries. The remaining Nondurable Goods industries were unchanged over the month. On an annual comparison, this sector is down 4,800 jobs, with the largest declines reported in Jewelry-Silverware (-1,900) and Textiles (-1,300). Also showing sizable annual job losses were Miscellaneous Manufacturing (-700), Apparel (-500), Leather Products (-400) and Paper Products (-300). Over the year gains of 300 workers occurred in Food-Beverage and Rubber Products.

NONMANUFACTURING

The number of workers employed in Rhode Island's Nonmanufacturing industries rose slightly in November to 275,900. While this represented a gain of 300 jobs from October, the current figure is still 2,800 below the level of one year ago.

For the month, Wholesale and Retail Trade employment rose to 79,600, an increase of 200 workers — due primarily to seasonal gains in the general merchandise sector. Government employment was also up 200 from October to a level of 57,900, and Services employment was up by 100 jobs to a November total of 91,300. Transportation & Public Utilities, at 13,400, and Finance, Insurance and Real Estate, at 21,300, showed no change from their respective October levels, and Contract Contruction decreased by 200 jobs over the month to 12,400.

Compared to November 1981, total Nonmanufacturing employment is down 2,800 jobs. The greatest annual decline (-2,900) occurred in the Trade sector, but losses were also reported in Construction (-600) and Government (-800). Posting employment gains in the one-year period were Services (+1,000), Finance, Insurance & Real Estate (+300) and Transportation & Public Utilities (+200).

HOURS & EARNINGS

Average hourly earnings for Rhode Island's production and related workers gained 5 cents over the month to $6.73 an hour and was 44 cents higher than in November, 1981. Average weekly hours worked, at 39.0, were up by 0.9 in the month but down by 1.0 hour compared to a year ago. Average weekly earnings for these production workers increased $7.96 over the month to $262.47 a week—up $10.87 from last November.

GOVERNOR

VOLUME 29 JANUARY 1983 NUMBER 1

RHODE ISLAND JOBS DECLINE 2,600 IN DECEMBER

Overall employment in Rhode Island declined in December, marking the third consecutive monthly drop. Nearly all of this monthly job loss occurred in the State's Manufacturing industries, reported Mary C. Hackett, Director of the Rhode Island Department of Employment Security.

According to preliminary estimates prepared by the Department of Employment Security, in cooperation with the U. S. Department of Labor's Bureau of Labor Statistics, there were 391,700 workers employed in Rhode Island in mid-December. This represents a reduction of 2,600 jobs from the November level and is down 10,500 from the total recorded in December, 1981.

MANUFACTURING

Manufacturing employment in Rhode Island declined by 2,500 jobs in December to a total of 115,900. Compared to the figure recorded one year ago, this represents a decline of 7,100 jobs.

In the Durable Goods manufacturing sector the net monthly job loss numbered 100, as declines in Lumber/Furniture (-100) and Nonelectric Machinery (-100) were partially offset by a gain in Transportation Equipment (+100). The remaining Durable Goods industries were unchanged from their November levels. Over the one-year period, total employment in this sector decreased by 2,100 jobs. The largest drop occurred in Electrical Machinery (-800), followed by Instruments (-600), Nonelectric Machinery (-500), and Primary Metals (-400). Yearly losses also were reported in Fabricated

EMPLOYERS!

✓ ✓ ✓ ✓ CHECK ✓ ✓ ✓ ✓

YOUR ACCOUNT CHARGES

The Department of Employment Security conducts a vigorous overpayment and fraud detection and prevention program to insure that unemployment insurance benefits are paid only to those individuals entitled to them. You, as an employer, play a major role in this effort to protect the integrity of the UI system. Your compliance with the rules of the Department helps to detect and prevent overpayment and ensures proper charges to your account.

The Department sends a form — Notice of Benefits Paid (DES-EA-100) — monthly to employers which lists present or former employees to whom unemployment insurance benefits have been paid and charged to the employer's account. This listing also indicates the week(s) for which the person was paid benefits, the dates of payment and the amount of benefits.

It is important that employers check this form closely and report any discrepancies to this Department as soon as possible. If you believe that the charges listed on the notice should not have been made to your account, you must request reconsideration within 15 days of the mailing date. Instructions for filing the protest are on the reverse of the form. Employers with any questions about information listed on the DES-EA-100 should be directed to:

AN IMPORTANT REMINDER TO EMPLOYERS

Employment Security and Temporary Disability Insurance reports of employment wages and taxes for the quarter ending December 31, 1982, must be filed by January 31, 1983, with the Department of Employment Security, 24 Mason Street, Providence, R. I. Failure to make these reports and to pay required taxes by the due date will make employers liable to penalties and additional interest charges. "No payroll" reports must be submitted in those cases where no wages were paid during the quarter covered by the report.

Metals (-200) and Lumber/Furniture and Stone-Clay-Glass (-100 each). The only industry in this sector showing a gain since last December was Transportation Equipment (+600).

Nondurable Goods employment declined 2,400 for the month and 5,000 compared to last December. The greatest monthly job losses occurred in Jewelry-Silverware (-1,100), Miscellaneous Manufacturing (-700), and Apparel (-200). Textiles, Paper, Plastics and Leather Products all declined by 100 jobs in December, while the remaining industries in this sector were unchanged. On an annual basis, the largest losses were reported in Jewelry-Silverware (-2,000), Textiles (-1,200), and Miscellaneous Manufacturing (-1,000), with smaller declines observed in Apparel (-400), Paper and Leather Products (-300 each), Plastics Products (-200), and Printing-Publishing and Chemical Products (-100 each). Both Food-Beverage and Rubber Products were up 300 in employment since last December.

NONMANUFACTURING

Rhode Island employment in the various Nonmanufacturing categories declined by 100 jobs from November to a total of 275,800 this month. The current total is, however, down 3,400 from the level of one year ago.

Within this sector, Trade posted a smaller than usual seasonal gain of 700 jobs and, at 80,300, the monthly level is down 3,600 from last December. Finance, Insurance and Real Estate employment remained at 21,300 in the November-December period, but is up 200 when compared to a year ago.

The largest monthly loss occurred in Contract Construction which dropped by 300 jobs to a total of 12,100 in December – 500 below the figure reported in the same month last year. Transportation & Public Utilities, at 13,300, was down 100 for the month but remained even with the year ago figure. Both Service and Government employment declined by 200 jobs in December to levels of 91,100 and 57,700, respectively. For the one-year period, Service employment was up by 1,100 and the Government sector was down by 600 jobs.

HOURS AND EARNINGS

Average hourly earnings for Rhode Island's production and related workers in manufacturing industries gained 4 cents over the month to $6.77 per hour and was 50 cents higher than in December, 1981. Average weekly hours for these workers increased by 0.7 of an hour in December to 39.7 hours, and was up 1.7 hours from a year ago. Average weekly earnings rose to $268.77 in December, an increase of $6.30 for the month and a yearly gain of $30.51.

EMPLOYMENT BULLETIN

STATE OF RHODE ISLAND
J. JOSEPH GARRAHY
GOVERNOR

VOLUME 29 FEBRUARY 1983 NUMBER 2

RHODE ISLAND EMPLOYMENT DECLINED SEASONALLY IN JANUARY TO 383,400

Overall Rhode Island employment decreased substantially in January, led by seasonal declines in the Trade, Services, Jewelry-Silverware, and Construction segments of the State's economy, according to Mary C. Hackett, Director of the Rhode Island Department of Employment Security.

Establishment employment in January totalled 383,400, based on preliminary estimates compiled by the Department of Employment Security in cooperation with the U.S. Department of Labor's Bureau of Labor Statistics. The monthly comparison indicates a loss of 8,000 workers, while on an annual basis, the January employment level is 2,600 below the year ago total of 386,000.

EMPLOYMENT ESTIMATES REVISED

Published estimates for 1981 and 1982 have been revised to a first quarter 1982 benchmark. Current figures reflect data on new firms, expansion or contration in existing firms not sampled, as well as non-covered establishments, and also reflects changes in assigned industrial coding caused by product or service changes occurring in 1981-1982.

MANUFACTURING

Total Manufacturing employment declined by 1,700 jobs in the month to 114,000. Annually, Manufacturing employment was 4,900 jobs lower than the January, 1982 figure of 118,900.

In the Durable Goods manufacturing sector, January employment remained even with the December figure of 51,500, but was down 700 jobs compared to January,1982. Within this group, monthly gains of 100 jobs reported in Transportation Equipment and Instruments were offset by losses of 100 in

10 GOOD REASONS
TO LIST YOUR JOB OPENINGS
WITH RHODE ISLAND JOB SERVICE

1. Job Service works with employers to recruit, screen, refer and place workers in the jobs you need filled.
2. We are the single largest source of job-ready applicants in Rhode Island.
3. We fill jobs across the entire spectrum of the work force.
4. Hundreds of Rhode Island employers already use us to recruit their workers.
5. For more than 50 years the public employment service has been a dependable community source of job applicants whenever employers have needed them. You know us. We know you.
6. Your job orders get statewide exposure through the computerized Job Bank.
7. Through our system of twelve local offices statewide, we can serve all employers and all job seekers all over Rhode Island.
8. We speed the placement of qualified applicants. Positive recruitment — Job Service will do it for you with on-site staff assistance and telephone service if needed.
9. We save you time and money by referring only those able and available to work for you — people likely to meet your needs.
10. Job Service does not charge a fee to employers or applicants. Job Service is already working for you.

WARREN AND WEST WARWICK DESIGNATED LABOR SURPLUS AREAS

Effective February 1, 1983, the Towns of Warren and West Warwick have been added to the list of Labor Surplus Areas by the U.S. Department of Labor. This classification makes the Towns eligible for preference in receiving federal contracts, as are the other Rhode Island cities and towns on the following list. The Labor Surplus classifications for these municipalities are effective through May 31, 1983.

Bristol

Central Falls

Johnston

New Shoreham

Pawtucket

(Continued from Page 1)

both Primary and Fabricated Metals. The remaining Durable Goods industries were unchanged in the December-January period. Compared to one year ago, however, declines in Nonelectrical Machinery (-600), Primary Metals and Instruments (-500 each) and Electrical Machinery (-300) exceeded gains recorded in Transportation Equipment (+1,100), and Lumber/Furniture and Fabricated Metals (+100 each).

Overall employment in the Nondurable Goods manufacturing industries showed a monthly decline of 1,700 jobs to a January total of 62,500. This total is 4,200 below the January, 1982 level. The largest monthly job losses in this sector occurred in Jewelry-Silverware (-1,100) and Textiles (-400). A decline of 200 was reported in Plastics Products, while Chemical, Rubber, and Leather Products, Apparel and Printing-Publishing all lost 100 in employment. The Miscellaneous Manufacturing category was up 500 for the month and Food-Beverage and Paper Products showed no change. On an annual comparison, Jewelry-Silverware (-1,500), Textiles (-900), Apparel (-600), Miscellaneous Manufacturing (-500), and Printing-Publishing (-400) were all down significantly from last January. Decreases of 200 each were reported in Paper, Chemical, and Plastics Products. Food-Beverage, Rubber, and Leather Products were each up 100 jobs from their one year ago levels.

NONMANUFACTURING

January employment in Nonmanufacturing establishments experienced sharp declines due to expected seasonal influences. For the month, Nonmanufacturing employment totalled 269,400, down 6,300 from the December figure, but up 2,300 compared to last January.

Following the end of the holiday season, Trade employment declined by 3,400 from December to a total of 76,900. This represents an annual decrease of 1,200 jobs. Also showing sizable seasonal losses were the Service and Contract Construction segments. The former, at 89,300 was down 1,800 from December while the latter, at 11,400, was off 700 from the prior month. Both of these segments, however, showed substantial gains compared to one year ago – Service employment was up 1,600 and Construction reported 1,900 more jobs.

Transportation and Public Utilities employment numbered 13,100, down 200 from December, but up 200 since January, 1982. Finance, Insurance and Real Estate firms maintained their employment level at 21,300 in the December – January period, but overall employment was up 500 from one year ago. Total Government employment decreased by 200 in January to 57,400, and was 700 below January's level.

HOURS AND EARNINGS

Average hourly earnings for Rhode Island's production and related workers rose 4 cents over the month to $6.81 an hour and were 40 cents higher than in January 1982. Average weekly hours worked were down by 1.0 hour in the month but up by 1.1 hours compared to a year ago. The average weekly earnings for these production workers decreased $5.22 over the month to $263.55 a week – up $22.53 from last January.

VOLUME 29 MARCH 1983 Number 3

RHODE ISLAND EMPLOYMENT INCREASES TO 383,900 IN FEBRUARY

Overall employment in Rhode Island increased slightly in February as increases in Nonmanufacturing employment more than offset a small reduction in the factory jobs total, reported Mary C. Hackett, Director of the Rhode Island Department of Employment Security.

Preliminary estimates prepared by the Rhode Island Department of Employment Security, in cooperation with the U.S. Department of Labor's Bureau of Labor Statistics, indicate 383,900 workers were employed in Rhode Island in mid-February, an increase of 500 jobs from the January level. However, on an annual comparison, February employment remained 1,600 below the year ago employment total of 385,500.

MANUFACTURING

Total Manufacturing employment in Rhode Island decreased by 100 jobs in February to 113,900 and was 3,900 below the level of one year ago. Within this sector, the Durable Goods producing industries, at 51,900, showed monthly and annual gains of 400 and 500 jobs, respectively, while in the Nondurable Goods industries the February total of 62,000 represents a monthly loss of 500 jobs and an annual decline of 4,400.

In the Durable Goods manufacturing category, monthly gains of 200 jobs were recorded in both Electrical Machinery and Transportation Equipment, while Primary Metals and Nonelectric Machinery were each up by 100 jobs in the January – February period. No monthly employment change was reported in either Stone-Clay-Glass or Instruments. Lumber/Furniture and Fabricated Metals (-100 each) were the only Durable Goods industries showing monthly employment losses. On an annual comparison, Transportation Equipment (+1,300) recorded, by far, the largest gain, while Fabricated Metals (+200), Lumber/Furni-

EMPLOYERS!

HELP YOURSELF BY HELPING YOUTH THIS SUMMER

This summer you can give a young person the chance of a lifetime – for a lifetime of success.

Your business can save in taxes by taking credit for hiring young people into summer jobs. The Targeted Jobs Tax Credit allows you to give young people an opportunity for a job and give your business a tax break at the same time.

By hiring an eligible young person between May 1 and September 15 you can earn a tax credit of 85% of the first $3,000 paid in wages to each eligible employee, for up to 90 days. To be eligible, the youth must be:

– 16-17 years of age
– economically disadvantaged
– first-time employee of your company

This new category is the Summer Youth Target Group.

TJTC – it's easy; it's different. The paperwork is not complicated – two simple forms to establish the new worker's eligiblity for the credit.

List your TJTC job orders with the Rhode Island Job Service. Call 277-6950 or any local office. They are listed on page 2 of this Bulletin.

COVENTRY, EAST PROVIDENCE, AND NORTH PROVIDENCE DESIGNATED LABOR SURPLUS AREAS

Effective March 1, 1983, Coventry, East Providence, and North Providence have been added to the list of Labor Surplus Areas by the U.S. Department of Labor. This classification makes these communities eligible for preference in receiving federal contracts, as are the other Rhode Island cities and towns on the following list. The Labor Surplus classifications for these municipalities are effective through May 31, 1983.

ture (+100) and Stone-Clay-Glass (+100) were also up since last February. Annual decreases occurred in Nonelectric Machinery (-500), Instruments (-400), Primary Metals (-200) and Electrical Machinery (-100).

Within the Nondurable Goods sector, the Jewelry-Silverware industry (-500) showed the largest month to month decrease, followed by Food-Beverage and Plastics Products (-100 each). Employment increases of 100 were reported in both Leather Products and Miscellaneous Manufacturing and the remaining Nondurable industries were unchanged from their January levels. Compared to February of last year, the most sizable job losses occurred in Jewelry-Silverware (-1,800), Textiles (-1,200) and Apparel (-700). Also down in employment from one year ago were Printing-Publishing and Miscellaneous Manufacturing (-400 each), Plastics Products (-300) and Chemical Products (-200). Increases over this one-year period were recorded in Rubber and Leather Products (+200 each), and Paper Products and Food-Beverage (+100 each).

NONMANUFACTURING

Overall employment in Rhode Island's various Nonmanufacturing categories increased to 270,000 in February – up 600 from the January level and 2,300 higher than the total recorded last February.

The largest monthly increase was observed in the Service sector where gains in private education resulted in an overall rise of 1,100 jobs. The February total of 90,400 also represents an increase of 1,300 compared to the same month last year. The only other Nonmanufacturing category posting a monthly increase was Government which, at 57,600, was up 200 from January but down 300 from the year ago total.

Employment in Wholesale and Retail Trade establishments declined by 600 jobs in the month – and 1,300 over the one-year period – to a February total of 76,300. Also down for the month was Contract Construction. However, while this industry lost 100 jobs in the January – February period, the current total of 11,300 remained 2,100 above the February, 1982 employment figure.

Transportation and Public Utilities, at 13,100, and Finance, Insurance and Real Estate, at 21,300, were unchanged from their respective January levels. Both, however, showed improvement compared to last year at this time. The former was up by 100 while the latter increased by 400 jobs over the year.

HOURS AND EARNINGS

Average hourly earnings for Rhode Island's production and related workers rose 5 cents over the month to $6.86 an hour and was 43 cents higher than in February, 1982. Average weekly hours worked were down by 3.5 hours in the month and down by 0.1 of an hour compared to a year ago. The average weekly earnings for these production workers decreased $22.08 over the month to $241.47 a week – down $8.01 from last February. The decreases in hours worked and weekly earnings were primarily caused by time lost by production workers as a result of a snowstorm which occurred during the monthly reporting period.

VOLUME 29 APRIL 1983 Number 4

RHODE ISLAND JOBS INCREASE TO 385,500 IN MARCH

Total establishment employment in Rhode Island increased by 1,600 jobs in March with gains occurring in both the Manufacturing and Nonmanufacturing sectors, reported Mary C. Hackett, Director of the Rhode Island Department of Employment Security.

According to preliminary estimates prepared by the Department of Employment Security, in cooperation with the U. S. Department of Labor's Bureau of Labor Statistics, Rhode Island employment totalled 385,500 in March. While this compares favorably with the previous month's total of 383,900, the current figure remains 1,300 jobs below the 386,800 level of March, 1982.

MANUFACTURING

Overall employment in Rhode Island Manufacturing industries increased by 900 in March, marking the first monthly job gain since October, 1982. The current figure of 114,800 is still, however, 3,000 below the one-year ago total of 117,800.

Durable Goods manufacturing firms reported employment of 52,200 for the month – up 300 from February and 700 above the level of last March. Within this sector, Transportation Equipment (+200), Lumber/Furniture (+100) and Electrical Machinery (+100) posted monthly increases, while Nonelectric Machinery (-100) declined from the prior month. The remaining Durable Goods industries showed no change from February. Compared to one year ago, Transportation Equipment (+1,500) reported the largest increase, followed by Fabricated Metals (+300), Lumber/Furniture (+100) and Stone-Clay-Glass (+100). Annual losses occurred in Nonelectrical Machinery (-600),

Seminar for Employers

CHALLENGES & PARTNERSHIPS FOR THE 1980'S

The Rhode Island Job Service and Job Service Employer Committees representing business and industry throughout the State will sponsor a one-day seminar next month for individuals responsible for recruiting and training workers, for maintaining affirmative action programs and for setting policy direction. The session will be held on Thursday, May 26, 1983 at the downtown Providence Holiday Inn.

Issues to be addressed include the Federal Job Training Partnership Act which replaces the CETA program on October 1, 1983, and the Targeted Jobs Tax Credit program as well as such "in-house" issues as company employee assistance programs dealing with the troubled employee and the legal ramifications of terminating employees. Speakers include Mary C. Hackett, Director of the Department of Employment Security and Mr. Arthur Markos, Deputy Director of the R.I. Department of Economic Development.

The seminar is open to all Rhode Island employers and there will be a $20 registration fee to defray the costs of the luncheon and other expenses. If you are interested in attending and learning more about the challenges and partnerships awaiting government and the private sector in the 1980's, call R. I. Job Service at 277-3574 or Eileen Schanck, Murdock Webbing Company, 724-3000.

$$

AN IMPORTANT REMINDER TO EMPLOYERS

Employment Security and Temporary Disability Insurance reports of employment wages and taxes for the quarter ending March 31, 1983, must be filed by April 30, 1983, with the Department of Employment Security, 24 Mason Street, Providence, R I. Failure to make these reports and to pay required taxes by the due date will make employers liable to penalties and additional interest charges. "No payroll" reports must be submitted in those cases where no wages were paid during the quarter covered by the report.

Instruments (-400), Primary Metals (-200), and Electrical Machinery (-100).

Total Nondurable Goods employment, at 62,600, was up 600 for the month but down 3,700 compared to the March, 1982 total. Modest monthly gains occurred in a number of industries, including Jewelry-Silverware and Textiles (+200 each), along with Printing-Publishing, Leather Products, and Miscellaneous Manufacturing (+100 each). The remaining Nondurable Goods industries, except Food-Beverage (-100), stayed even over the February-March period. On an annual comparison, small increases have occurred in Food-Beverage and Leather Products (+200 each) as well as in Paper and Rubber Products (+100 each). These gains were far exceeded by annual losses in the remainder of this sector. The largest declines were reported in Jewelry-Silverware (-1,200), Textiles (-900), Apparel (-800), and Miscellaneous Manufacturing (-600). Also down over the one year period were Printing-Publishing and Chemical Products (-300 each) and Plastics Products (-200).

NONMANUFACTURING

Rhode Island employment in the various Nonmanufacturing categories rose by 700 jobs from February to a total of 270,700 this month. The March total is also 1,700 higher than the level of one year ago.

The largest monthly gain occurred in Wholesale and Retail Trade, which increased by 400 jobs to a total of 76,700 – still, however, 1,300 below the year ago figure. Both Contract Construction, at 11,500, and Services, at 90,600, expanded by 200 jobs in the February-March period. Compared to March of last year, the former is up 1,800 in employment and the latter is up by 1,000 jobs.

The only Nonmanufacturing category showing a monthly job loss was Finance, Insurance and Real Estate which dropped by 100 to a total of 21,200. This figure is still, however, 300 above the level of one year ago. Transportation and Public Utilities employment stayed unchanged at 13,100, but is up 100 compared to the year earlier total. Total Government employment also was static over the month, but the March total of 57,600 is 200 lower than the level recorded last year in March.

HOURS AND EARNINGS

Average hourly earnings for Rhode Island's production and related workers rose 4 cents over the month to $6.90 an hour and was 42 cents higher than in March, 1982. Average weekly hours worked were up by 4.1 hours in the month and up by .3 of an hour compared to a year ago. The average weekly earnings for these production workers increased $29.70 over the month to $271.17 a week – up $18.45 from last March. It should be noted that a significant portion of the unusually large monthly increases in hours worked and weekly earnings were due to the fact that the previous month's figures had been adversely affected by a snowstorm which resulted in lost hours and earnings during the February reporting period.

RHODE ISLAND JOBS INCREASE 3,800 IN APRIL TO 389,300

A gain in overall Manufacturing employment combined with seasonal hiring in the Trade, Services and Construction industries increased Rhode Island total employment to its highest level of the year, reported Mary C. Hackett, Director of the Rhode Island Department of Employment Security.

Preliminary estimates prepared by the Rhode Island Department of Employment Security, in cooperation with the U. S. Department of Labor's Bureau of Labor Statistics, indicate 389,300 workers were employed in Rhode Island in mid-April. Total employment in April increased by 3,800 jobs compared to March and was 1,700 higher than the year ago employment level of 387,600.

MANUFACTURING

Rhode Island Manufacturing employment recorded a moderate increase of 800 jobs from the previous month but was still 1,200 below the total employment level of 116,800 reported one year ago. Within the Manufacturing sector, employment in the State's Durable Goods producing industries rose 300 over the month to 52,500, or 1,200 higher than the April, 1982 figure. An April total of 63,100 jobs was reported in the Nondurable Goods industries, up 500 from the previous month but still down 2,400 jobs from the level of one year ago.

Within the Durable Goods sector, monthly increases of 100 jobs occurred in Lumber/Furniture, Stone-Clay-Glass, Electrical Machinery, and Transportation Equipment. Nonelectrical Machinery declined by 100 jobs from March to April, while the remaining Durable Goods industries were unchanged during this period. Compared to April of last year, Transportation Equipment (+1,500) showed, by far, the largest

50 JOB SERVICE — Working Harder To Keep America Working

JOB SERVICE CELEBRATES 50th ANNIVERSARY IN 1983

1983 marks the fiftieth anniversary of the passage of the Wagner-Peyser Act, the landmark federal legislation that established the nation's public employment service, today referred to as the Job Service. Born during the Great Depression and now the longest continuous Federal-State cooperative program in the nation, Job Service, today, is America's foremost labor exchange with some 2,500 offices in communities across the land registering, screening and referring applicants to employers needing workers.

The impact that the Job Service makes on the nation's economy is significant. During Fiscal Year 1982 the Job Service placed almost five million applicants in jobs and it is estimated that they earned a total of more than $16 billion in wages. Along with the Unemployment Insurance and the Labor Market Information program, Job Service is one of the major government efforts that actively seeks to reduce unemployment while standing ready to rapidly fill job openings during economic recovery. Job Service is the single largest source of job-ready applicants in the country.

Mary C. Hackett, Director of Employment Security, urges employers to list their job openings with the Rhode Island Job Service. Call the Job Bank at 277-3588 (toll-free Enterprise 2265) or any of the twelve local offices of the Job Service listed on page two of the Employment Bulletin.

Job Service! Fifty years of service to America's employers and job seekers and still going strong!

(Continued from Page 1)

gain. Also up from a year ago were: Lumber/Furniture (+100), Stone-Clay-Glass (+200), Fabricated Metals (+200), and Electrical Machinery (+200). An annual loss of 900 occurred in Nonelectric Machinery and a drop of 100 since last year was recorded in Instruments. Primary Metals employment remained at its one year ago level.

In the Nondurable Goods sector, monthly increases of 200 jobs took place in both Textiles and Jewelry-Silverware and gains of 100 occurred in both Plastics Products and in the Miscellaneous Manufacturing category. Food-Beverage employment dropped by 100 from March to April while the remaining Nondurable Goods industries remained stable in employment over the month. On an annual comparison, declines have occurred in most of the individual industries, including: Textiles, Jewelry-Silverware and Miscellaneous Manufacturing (-600 each), Apparel (-500) and Printing-Publishing and Chemical Products (-300 each). Small annual gains of 100 jobs each were reported in Food-Beverage, Paper Products and Leather Products, while Rubber Products increased 200 during this period. April employment in Plastics Products stood even with its year ago total.

NONMANUFACTURING

Overall employment in Rhode Island's Nonmanufacturing establishments rose seasonally in April to a total of 273,700. This represents a gain of 3,000 jobs from the March total and is 2,900 higher than the level recorded last April.

The largest monthly employment gain occurred in Trade which rose 1,600 to a total of 78,300, primarily due to increased hiring in eating and drinking establishments. Even with this increase, however, the current total remains 700 below the April, 1982 figure.

Both Contract Construction and Services also reported seasonal increases in April and both were also up compared to one year ago. Construction employment reached 12,200 for the month — up 700 from March and 1,500 above the April, 1982 level. In the Service sector, April employment totalled 91,200, representing monthly and annual gains of 600 and 1,000 jobs, respectively.

Also showing monthly and annual employment gains were Transportation & Public Utilities and Finance, Insurance & Real Estate. The former, at 13,200, was up 100 for the month and 200 over the year, while the latter, at 21,300, increased 100 since March and 400 since last April. Total Government employment declined 100 over the month to 57,500 but remained 500 above the total recorded one year ago in April.

HOURS AND EARNINGS

Average hourly earnings for Rhode Island's production and related workers rose 2 cents over the month to $6.92 an hour and was 37 cents higher than in April 1982. Average weekly hours worked were up by 0.3 of an hour in the month and up by 0.6 of an hour compared to a year ago. The average weekly earnings for these production workers increased $2.86 over the month to $274.03 a week — up $18.58 from last April.

VOLUME 29 JUNE 1983 Number 6

RHODE ISLAND JOBS INCREASE 3,000 IN MAY TO 392,300

Continued seasonal hiring in the Services and Trade sectors combined with gains in the Nondurable Goods Manufacturing industries brought overall Rhode Island employment to its highest level of the year, reported Mary C. Hackett, Director of the Rhode Island Department of Employment Security.

According to preliminary estimates prepared by the Department of Employment Security, in cooperation with the U. S. Department of Labor's Bureau of Labor Statistics, Rhode Island employment totalled 392,300 in May. While this figure is still 500 below the one year ago level, it does represent a gain of 3,000 jobs from the April total of 389,300.

MANUFACTURING

Overall Employment in Rhode Island Manufacturing industries increased by 500 in May bringing it to its highest level since November of last year. The current total of 116,100 is also within 300 jobs of the May, 1982 figure of 116,400.

In the Durable Goods manufacturing sector, the May employment total of 52,300 represented a drop of 200 from the April level but was 1,300 above the total recorded one year ago in May. Within this sector, monthly job losses of 100 in both Lumber/Furniture and Primary Metals and 200 in Nonelectric Machinery more than offset gains of 100 jobs each in Transportation Equipment and Instruments. The remaining Durable Goods industries were unchanged during the April-May reporting periods. On an annual comparison, Transportation Equipment (+1,500) recorded, by far, the largest gain, followed by Electrical Machinery and Fabricated Metals (+300 each). Also up in employment from last May were Stone-Clay-Glass (+200) and Lumber/Furniture (+100). Nonelectrical Machinery (-1,000) and Primary Metals (-100) both re-

JOB SERVICE – 50 YEARS OLD AND GETTING BETTER

As Job Service begins its second half century of service to Rhode Island employers, Mary C. Hackett, DES Director, urges the employer community to continue to list job openings with the Job Service – – for some very good reasons:

- Job Service is the single largest source of job-ready applicants in Rhode Island.
- Some job applicants can qualify employers who hire them for substantial tax credits. Job Service will certify employees for TJTC – the Targeted Jobs Tax Credit program.
- Job-ready applicants are referred to you in the numbers and within the time-limits you set.
- Job Service provides Labor Market Information and Affirmative Action Recruitment Assistance.
- Job Service is where most employers are. Local offices in twelve Rhode Island communities where business and industry are concentrated.
- Job Service is a governmental agency willing to listen to the ideas, complaints and concerns of employers and to improve services as a result of employer input.

These services – and many more – are available through your local Job Service office. A listing of these offices is on page two of the Employment Bulletin.

Employers are urged to list job openings with the Job Bank. Call 277-3588 or toll-free Enterprise 2265. Because Job Service is employer tax-supported, there is no user fee charged for any of these services.

ported employment below their year ago May levels, while Instruments remained even with last May's total.

Overall employment in the Nondurable Goods manufacturing industries was up by 700 jobs from April to May. However, the current total of 63,800 remains 1,600 below the May, 1982 level. Over the past month small gains occurred in a number of Nondurable Goods producing industries, including: Food-Beverage (+100), Textiles (+200), Paper Products (+100), Plastics Products (+100), Leather Products (+100), and Jewelry-Silverware (+200). Printing-Publishing, Chemical Products, Rubber Products and the Miscellaneous Manufacturing category reported no monthly change, while Apparel declined by 100 jobs from its April figure. Compared to one year ago levels, Apparel and the Miscellaneous Manufacturing categories (-600 each) recorded the most sizable declines, but Textiles (-400), Printing-Publishing, Chemical Products and Jewelry-Silverware (-300 each) were also down over this period. Small annual gains of 200 jobs each were recorded in Food-Beverage, Rubber Products, Plastics Products and Leather Products while an increase of 100 occurred in Paper Products employment.

NONMANUFACTURING

Total employment in Rhode Island Nonmanufacturing establishments climbed by 2,500 from April to May primarily due to seasonal hiring in Trade and Services. The May total of 276,200 is also close to the May, 1982 level of 276,400.

Within this sector, Trade posted the largest monthly gain as it rose 1,200 from April to reach 79,500 for May. However, it also has reccorded the largest annual decline with the current total being 1,500 jobs below the one year ago level.

Showing both monthly and annual employment increases were Contract Construction and Services. Employment in the former numbered 12,300 in May — up 100 jobs over the prior month and up 600 compared to last year at this time. In the latter category, the current total of 92,200 represents a monthly gain of 1,000 and an annual increase of 600 jobs.

Both Transportation & Public Utilities, at 13,300, and Government, at 576,00, posted monthly increases of 100 jobs. Conversely, the current totals in each of these segments are 100 below their employment levels of May, 1982. Finance, Insurance & Real Estate employment remained constant in the April to May period, but the current total of 21,300 represents an increase of 300 jobs compared to the figure recorded in May of last year.

HOURS AND EARNINGS

Hourly earnings for Rhode Island's production and related workers averaged $6.91 in May, down one cent from the April average but up 33 cents compared to May, 1982. Average weekly hours worked remained at 39.6, unchanged from April but up 0.4 of an hour from the one year ago average. Weekly earnings for these workers averaged $273.64 in May, down 39 cents from a month earlier, but up $15.70 compared to the May, 1982 total.

EMPLOYMENT BULLETIN

STATE OF RHODE ISLAND
J. JOSEPH GARRAHY
GOVERNOR

VOLUME 29 JULY 1983 Number 7

RHODE ISLAND EMPLOYMENT INCREASES 3,500 IN JUNE TO 395,800

Continued gains in overall Manufacturing employment combined with seasonal hiring in the Trade and Construction industries increased total employment in the State to its highest level since last June, reported Mary C. Hackett, Director of the Rhode Island Department of Employment Security.

Based on preliminary estimates prepared by the Department of Employment Security, in cooperation with the U. S. Department of Labor's Bureau of Labor Statistics, 395,800 workers were employed in Rhode Island in mid-June. While this figure is 300 below the one year ago employment level, the total employment increase of 3,500 jobs in the month continued an upward trend that started in February, 1983.

MANUFACTURING

Overall Rhode Island Manufacturing employment increased substantially by 1,500 jobs from the previous month to a total of 117,600. This figure is within 300 jobs of the total reported last June. Within the Manufacturing sector, employment in the Durable Goods industries increased 600 over the month to 52,900. This figure is 800 more than were employed last June and represents the highest Durable Goods employment level since December, 1981. The Nondurable Goods employment total of 64,700 represents a gain of 900 for the month but is still down 1,100 jobs compared to the one year ago figure.

In the Durable Goods sector the largest monthly increase was posted by Nonelectrical Machinery (+300) followed by gains of 100 jobs each in Primary Metals, Fabricated Metals and Instruments. The remaining industries in this sector remained unchanged during the month. Compared to June, 1982, Transportation Equipment (+1,200) recorded the largest gain, followed by smaller

50 Working Harder To Keep America Working

RHODE ISLAND JOB SERVICE MEANS DOLLARS AND SENSE TO EMPLOYERS

If you are a Rhode Island employer who plans to add a second or third shift, relocate to a larger facility or, perhaps, add a second or third location, you'll need additional workers. The Rhode Island Job Service can help you meet these needs.

Through its statewide network of local offices, the Job Service is prepared to answer your call for workers. Trained professional interviewers are able to offer a complete range of employment services to both employers and job-seekers – special worker recruitment, screening, referral and placement. Further, the Job Service mobile office van offers employers these services on location for mass recruitment and screening. There is no fee charged to either employer or job seeker for any of these services.

The process is simple and it starts with a phone call to the Job Bank at 277-3588 (toll-free Enterprise 2265) to list job openings. We'll do the rest. Openings are given statewide exposure in our twelve local Job Service offices. There's an office near you – see the listing on page two of this Bulletin.

AN IMPORTANT REMINDER TO EMPLOYERS

Employment Security and Temporary Disability Insurance reports of employment wages and taxes for the quarter ending June 30, 1983, must be filed by July 31, 1983, with the Department of Employment Security, 24 Mason Street, Providence, R. I. Failure to make these reports and to pay required taxes by the due date will make employers liable to penalties and additional interest charges. "No payroll" reports must be submitted in those cases where no wages were paid during the quarter covered by the report.

increases of 200 each in Instruments and Fabricated Metals, and 100 each in Stone-Clay-Glass and Electrical Machinery. Annual losses were reported in Nonelectrical Machinery (-900) and Primary Metals (-100). Lumber-Furniture remained unchanged over the year.

All industries in the Nondurable Goods sector recorded either a job gain or were unchanged from May to June. Monthly increases were reported in Jewelry-Silverware (+300), Apparel (+200), and in Food-Beverage, Textiles, Leather Products and Miscellaneous Manufacturing (+100 each). There were mixed annual changes with gains in Leather Products (+400), Food-Beverage and Plastics Products (+200 each) and in Paper and Rubber Products (+100 each). Job losses were recorded in Miscellaneous Manufacturing (-600), Apparel and Chemical Products (-400 each), Jewelry-Silverware (-300) and Textiles and Printing-Publishing (-200 each).

NONMANUFACTURING

Total Rhode Island employment in Nonmanufacturing establishments continued to increase, reaching a mid-June total of 278,200 — equal to the one year ago figure. The May to June gain of 2,000 jobs was due primarily to seasonal hiring in Trade and increased activity in Contract Construction throughout the State.

Within this sector, Trade recorded the largest monthly gain of 1,200 to a total of 80,700 in June. However, on an annual comparison the current total was 1,300 jobs below last June's employment level. Contract Construction reported a monthly increase of 500 to a total of 12,800 — up 700 from the year ago level of 12,100.

Both Finance, Insurance and Real Estate, at 21,400, and Services, at 92,300, posted monthly and annual employment gains. The former was up 100 from both May and last June, while the latter was up 100 from May and 1,100 compared to one year ago.

Also showing a monthly increase of 100 jobs was the Transportation and Public Utilities category. However, the June total of 13,400 represents a decrease of 400 compared to the June, 1982 level. Total Government employment, at 57,600, was unchanged from the prior month, but was down 200 from the total recorded one year ago in June.

HOURS AND EARNINGS

Average hourly earnings for Rhode Island's production and related workers decreased by 2 cents to $6.89 in June but was up 25 cents compared to a year ago. Average weekly hours worked gained 0.3 of an hour in the month and were up 0.9 of an hour from the one year ago average. The weekly earnings for these workers averaged $275.60, up $1.27 compared to last month and up $15.98 from the June, 1982 total.

VOLUME 29 AUGUST 1983 Number 8

RHODE ISLAND EMPLOYMENT DECLINES IN JULY TO 388,300

Employment declines in Manufacturing industries, due mostly to vacation-related plant closings combined with seasonal job decreases in the Nonmanufacturing sector, caused total establishment employment in Rhode Island to drop by 7,500 jobs in July, reported Mary C. Hackett, Director of the Rhode Island Department of Employment Security.

Based on preliminary estimates prepared by the Department of Employment Security, in cooperation with the U.S. Department of Labor's Bureau of Labor Statistics, Rhode Island employment totalled 388,300 in July. While this figure does reflect a monthly seasonal decline, it also represents a gain of 2,700 jobs from the July, 1982 total of 385,600.

MANUFACTURING

Reflecting losses due principally to industry plant closings for vacations, Manufacturing employment dropped by 5,400 jobs to 112,200 in mid-July. On an annual comparison, however, the current figure represents an increase of 1,700 jobs.

In the Durable Goods sector, the July employment total of 51,600 was down 1,300 from the June level but was 1,800 above the total recorded one year ago in July. Within this sector, monthly job losses of 100 occurred in Lumber/Furniture, Primary Metals, Nonelectric Machinery and Transportation Equipment. Declines were also posted by Fabricated Metals (-500) and Instruments (-400). The remaining Durable Goods industries remained unchanged during the month. On an annual comparison, gains reported in Transportation Equipment (+1,100), Fabricated Metals (+800), Electrical Machinery (+600), Instruments (+300) and Stone-Clay-Glass (+100) were partially offset by losses in Nonelectric

50 JOB SERVICE Working Harder To Keep America Working

TARGETED JOBS TAX CREDIT PROGRAM BENEFITS EMPLOYERS AND JOB-SEEKERS ALIKE

The Targeted Jobs Tax Credit program, administered through the R.I. Job Service, identifies nine target groups of eligible workers and provides employers with tax incentives for hiring individuals from these groups.

The tax credit is usually computed at 50 percent of the employee's first-year wages up to $6,000 per employee and 25 percent of the second-year's wages up to $6,000. This means a maximum allowable credit of $3,000 per employee the first year and $1,500 the second year. Under a new 1983 law employers who hire disadvantaged youth 16 or 17 years of age for summer jobs can claim 85 percent of their wages, up to $3,000 as a tax credit.

The target groups of TJTC-eligible workers are:

- Federal Supplemental Security Income (SSI) recipients (aged, blind and disabled).
- Local General Assistance (cash or non-cash) recipients for at least 30 days.
- Handicapped referred to the employer from Vocational Rehabilitation or the VA.
- Youth 16 to under 20 from economically disadvantaged families participating in a qualified cooperative education program.
- Vietnam-era veterans who are economically disadvantaged.
- Youth 18 but under 25 from economically-disadvantaged and within 5 years of prison release or conviction.
- Aid-to-Families-with-Dependent-Children (AFDC) recipients who have received it for 90 days prior to hiring and WIN participants.
- Economically-disadvantaged youth 16 or 17 who have not worked for the employer before and who are hired between May 1 and September 15.

For more information on the TJTC program contact any office of the R.I. Job Service listed on page 2 of this Bulletin or call 277-3727.

Machinery (-700), Primary Metals (-300) and Lumber/ Furniture (-100).

Overall employment in the Nondurable Goods industries, at 60,600, was down 4,100 from June to July and was also down, although only slightly, from the year ago total of 60,700. Within this sector, monthly decreases were posted in Jewelry-Silverware (-2,700), Textiles (-900), Plastics Products (-300), Apparel (-200) and Paper Products (-100). Miscellaneous Manufacturing (+100) posted the only monthly gain in this sector. The remaining industries were unchanged from last month's employment levels. Compared to a year ago, Food-Beverage and Leather Products gained 500 jobs each, followed by Plastics Products (+300) and Paper Products (+100). Annual losses were reported in Apparel (-600), Miscellaneous Manufacturing (-400), Jewelry-Silverware (-300) and Chemical Products (-200).

NONMANUFACTURING

Overall employment in Rhode Island's Nonmanufacturing establishments decreased 2,100 jobs from June to July, primarily due to seasonal layoffs in Trade and education-related employment in Transportation & Public Utilities and Local Government. The July total of 276,100, while 2,100 below last month, was 1,000 above the July, 1982 level of 275,100.

Within this sector the largest monthly decline occurred in Wholesale and Retail Trade as establishments reduced their work force seasonally by 700 jobs to a total of 80,000 — still up, however, 600 from the previous July.

Both Transportation & Public Utilities and Government reported monthly and annual decreases in July. The former, at 12,800, declined by 600 jobs in the month and 100 since July, 1982. The latter, at 57,000, also decreased by 600 jobs from the June total, and was 900 below the level of one year ago in July.

The Contract Construction industry was the only segment of the State's Nonmanufacturing category to post both monthly and annual job increases. The July total of 13,200 represents an employment gain of 400 from June and an increase of 600 compared to the July, 1982 figure.

HOURS AND EARNINGS

Average hourly earnings for Rhode Island's production and related workers increased by 5 cents to $6.94 in July and was up 19 cents compared to a year ago. The average work week declined by 1 hour in July to 39.0 hours — still, however, 1.6 hours more than the comparable one year ago figure. Average weekly earnings for these production workers amounted to $270.66 in July. While this represents a drop of $4.94 compared to the June average, it is up $18.21 from last July.
